

STOP! CLAIM UP TO A \$60 REWARD FOR THESE PARTS!

FIRST!

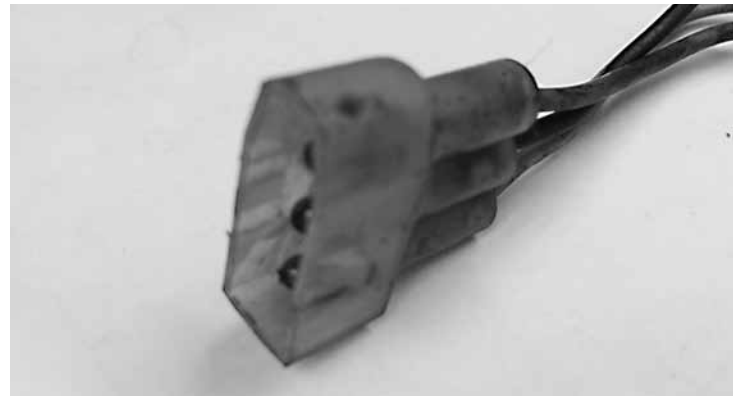

The female 2-wire connector that comes off your existing fuel pump should look like the one in this photo here. Cut it off as shown and return this in the included envelope for a **\$10 core refund**.

As this wire connector is no longer available, and re-making this part would be prohibitively expensive. By returning this part to DMC, it allows us to keep the Fuel Pump Sender Module as a completely “plug and play” part requiring no wiring modifications.

SECOND!

If you are replacing any style DeLorean fuel sender with a 3-wire connector as shown below:

Cut it off as shown and return this in the included envelope for an additional **\$10 core refund**.

Like the 2-wire one, this 3-wire connector is no longer available, and re-manufacturing this part would be prohibitively expensive. Returning this part allows us to keep the Fuel Pump Sender Module as a completely “plug and play” part requiring no wiring modifications.

Terms and conditions subject to change, contact us for the latest program details.

STOP! CLAIM UP TO A \$60 REWARD FOR THESE PARTS!

THIRD!

The fuel line fitting (106982) screwed into the hard metal fuel return line can also be included in the envelope for an additional **\$10 core refund**. Severely rusted or damaged fittings are not eligible for refund. **Be careful not to nick it with a blade when removing the rubber hose - that will ruin it!**

If the metal fuel return line (105020) shown at left is stainless and undamaged, is eligible for a **\$15 store credit when returned at your expense.**

FOURTH!

The metal fuel pump support (101644A), if stainless, is eligible for a **\$15 store credit when returned at your expense.**
